

**Huy T. Tran**

**Curriculum Vitae**

April 23, 2026

Address: Department of Aerospace Engineering  
University of Illinois Urbana-Champaign  
Urbana, IL 61801, USA

Phone: +1 217-300-3257

Email: huytran1@illinois.edu

Website: tran.aerospace.illinois.edu

**Appointments**

- Assistant Professor** 2021-  
University of Illinois Urbana-Champaign, Urbana, IL  
Department of Aerospace Engineering (100%)  
Coordinated Science Laboratory (0%)  
Affiliates: *Center for Autonomy, Illinois Robotics Group, Smart Transportation Infrastructure Initiative*  
Research: *AI and autonomy for multi-agent systems, robotics, and intelligent transportation systems*
- Research Assistant Professor** 2017-2021  
University of Illinois Urbana-Champaign, Urbana, IL
- Fellow in the AFRL Summer Faculty Fellowship Program** 2018  
The Air Force Institute of Technology, Wright-Patterson AFB, OH
- Sr. Multi-disciplinary Systems Engineer** 2016-2017  
The MITRE Corporation, Bedford, MA

**Education**

- Ph.D. in Aerospace Engineering** 2010-2015  
Georgia Institute of Technology, Atlanta, GA  
Dissertation: *A Complex Networks Approach to Designing Resilient System-of-Systems*  
M.S. Special Topic: *Investigation of Decentralized and Centralized Command and Control Strategies with Agent-Based Modeling*  
Advisor: Dimitri N. Mavris
- M.S. in Mechanical Engineering** 2008-2010  
University of Wisconsin-Madison, Madison, WI  
Thesis: *Investigation of fuel property and biodiesel effects in a highly dilute low temperature combustion regime with a light-duty diesel engine*  
Advisor: David Foster
- B.S. in Mechanical Engineering** 2004-2008  
North Carolina State University, Raleigh, NC  
*Magna Cum Laude*

## Awards

|                                                                                                             |           |
|-------------------------------------------------------------------------------------------------------------|-----------|
| Recipient of the Engineering Council Outstanding Advisor Award                                              | 2020      |
| Fellow in the 2018 AFRL Summer Faculty Fellowship Program                                                   | 2018      |
| Faculty advisor for the 1st place team in the AIAA 2017/2018 Undergraduate Team Aircraft Design Competition | 2018      |
| Included on the List of Teachers Ranked as Excellent by Their Students                                      | 2017      |
| Best Paper Award: Theoretical (Complex Adaptive Systems Conference)                                         | 2016      |
| Undergraduate Energy-Related Research Award (NC State University)                                           | 2007-2008 |
| Jesse S. Doolittle Endowed Scholarship (NC State University)                                                | 2006-2008 |

## Funding

### Research Grants

Cumulative awards: ~\$1,371,363 my portion (\$4,228,390 total)

|                                                                                                             |                 |
|-------------------------------------------------------------------------------------------------------------|-----------------|
| <b>Learning from Existing Systems for Emergent Coordination in Future Air Mobility</b>                      | 09/2023-08/2026 |
| Source: NASA                                                                                                |                 |
| Role: PI                                                                                                    |                 |
| Award: \$388,285 my portion (\$588,284 total)                                                               |                 |

| Role: Co-PI                                                                                                 |                 |
| Award: \$15,000 my portion (\$30,000 total)                                                                 |                 |

**Agile AI-assisted Architecture Assessment**

10/2018-09/2020

Source: The MITRE Corporation

Role: PI

Award: \$95,786 my portion (\$95,786 total)

**A Demonstration Platform for Dynamic Mission Planning with Multi-domain Autonomous Systems**

09/2018-12/2020

Source: DARPA

Role: PI

Award: ~\$230,452 my portion (\$550,344 total)

**Consulting****Network-theoretic Methods for Scaling MBSE Practices for SoS Applications**

02/2017-09/2017

Source: The MITRE Corporation

Role: Consultant

Award: 5% of time charged during 2017

### Non-Refereed Publications and Presentations

1. H. T. Tran<sup>†</sup>, C. Hutchins<sup>†</sup>, and X. Wang, "Measuring Electrical Contact Resistance between Gas Diffusion Layers and Bipolar Plates in PEM Fuel Cells", poster presented at the 2007 Michigan Space Grant Consortium, MI (2007).

### Teaching

- AE 199: Aerospace Computing (Spring 2020, Fall 2020)
  - Developed new course
- AE 202: Introduction to Aerospace Flight Mechanics (Fall 2018, Fall 2019, Fall 2021)
- AE 370: Aerospace Numerical Methods (Spring 2022, Fall 2022, Fall 2023, Fall 2024, Spring 2026)
  - Revamped weekly computational labs
- AE 442: Aerospace Systems Design I (Fall 2017)
- AE 443: Aerospace Systems Design II (Spring 2018)
  - **1st place AIAA 2017/208 Undergraduate Team Aircraft Design Competition**

- AE 498 CSE/CSO: Computational Systems Engineering (Spring 2017, Spring 2019, Spring 2025)
  - Developed new course
  - **List of Teachers Ranked as Excellent (2017)**
- AE 598 RL: Reinforcement Learning (Spring 2023, Fall 2025)
- Collins Scholar graduate - engineering education program (Spring 2017)

| J. Heglund: <i>Optimal Allocation of Resources in Multi-Agent Systems Under Uncertainty</i>                                   | Ph.D. 2020- |

### Alumni

|                                                                                                                                                                                                     |                |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------|
| W. Dimon: <i>Unsupervised Anomaly Detection in Multi-class Datasets using Generative Adversarial Networks</i> (placement at MITRE for machine learning, co-advised by Michael Lembeck)              | M.S. 2020-2022 |
| J. Heglund: <i>Statistical and Machine Learning Models for Critical Infrastructure Resilience</i> (placement at UIUC as Ph.D. student)                                                              | M.S. 2018-2020 |
| N. Van Stralen: <i>Hierarchical Reinforcement Learning for Adaptive and Autonomous Decision-making in Robotics</i> (placement at UIUC as Research Engineer)                                         | M.S. 2018-2020 |
| K. Thompson: <i>Data-driven Modeling for Resilient Networked Systems</i> (placement at Spark Insights for data science)                                                                             | M.S. 2017-2019 |
| K. R. Chandramouleeswaran: <i>Data-driven Modeling and Analysis of the U.S. Air Transportation Network and its Resilience to Extreme Events</i> (placement at Front End Analytics for data science) | M.S. 2017-2018 |

**Undergraduate Students through Research Programs**

AE 298: Introduction to Research: A. Rihani (2021); A. Arora (2022)

ALERT Program: L. Lalumandier (2022); B. Cadee (2022); V. Thatte (2022); P. Baffoe (2022)

ISGC Undergraduate Research Opportunities Program (UROP): O. Upalekar (2022); A. Arora (2023); S. Vazhathodiyil (2024)

Researchers Initiative (RI) Program: S. Bangaru (2019-2020); S. Sharma (2019-2020); A. Jain (2018-2019); A. Sehgal (2018-2020); J. Xue (2018-2019); D. Mulye (2018-2019); D. Yang (2018-2019)

**Doctoral Committees**

(graduation date and advisor in parenthesis)

Shubhendra Chauhan (2020, Grace Gao); Akshay Shetty (2021, Grace Gao); Gwendolyn J.Y. Chee (2022, Kathryn Huff); Nirmal Nair (2022, Andres Goza); Mehmet Ugur Akcal (2024, Girish Chowdhary); Junzhe Wu (2025, Girish Chowdhary); Holly Dinkel (2025, Tim Bretl); Pranay Thangeda (2025, Melkior Ornik); Jongwon Lee (2025, Tim Bretl); Su-Yeon Choi (2025, Tim Bretl); Hongrui Zhao (TBD, Negar Mehr); Tiffany Yuan (TBD, R. S. Sreenivas); Manav Vora (TBD, Melkior Ornik)

## Professional Activities

### Invited Talks

|                                                                                                                                                                                                |      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Invited speaker presentation at the NASA Collective Autonomy Seminar: <i>Learning for Multi-Agent Autonomy</i>                                                                                 | 2024 |
| Invited speaker presentation at the RSS 2023 Workshop on Inference and Decision Making for Autonomous Vehicles (IDMAV): <i>Learning for Decision Making in Cooperative Multi-agent Systems</i> | 2023 |
| Invited speaker presentation at the IROS 2022 Decision making in Multi-agent Systems Workshop: <i>On Utilities for Cooperative Multi-agent RL</i>                                              | 2022 |
| Research seminar presented at the GE Probabilistics Seminar Series: <i>Learning with Inductive Biases for Autonomous Decision-making</i>                                                       | 2021 |
| Research seminar presented at the University of Illinois at Urbana-Champaign: <i>Learning with Inductive Biases for Autonomous Decision-making</i>                                             | 2021 |
| Research seminar presented at Purdue University: <i>Harnessing Data for Resilient Systems: Resilience through data-driven modeling and machine intelligence</i>                                | 2019 |
| Research seminar presented at the Air Force Institute of Technology: <i>Towards Understanding Patterns in Critical Infrastructures with Social Media and Public Operational Data</i>           | 2018 |
| Welcoming remarks at the Complex Adaptive Systems Conference: <i>Moving Applied Complexity Science Forward</i>                                                                                 | 2016 |
| Research seminar presented at the University of Illinois at Urbana-Champaign: <i>A Complex Networks Approach to Designing Resilient System-of-Systems</i>                                      | 2016 |
| Research seminar presented at The MITRE Corporation <i>Improving the Resilience of Networked System-of-Systems with Reconfiguration</i>                                                        | 2015 |

### Conference Organization

|                                                                                                                                                                                |      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|
| Organizer and Session Co-Chair: <i>Annual Allerton Conference on Communication, Control and Computing - Learning and Planning in Adversarial Environments</i> (Monticello, IL) | 2019 |
| Organizing Committee: <i>Complex Adaptive Systems Conference</i> (Chicago, IL)                                                                                                 | 2018 |
| Session Chair: <i>2018 Annual IEEE International Systems Conference (SysCon) - Transportation Systems</i> (Vancouver, Canada)                                                  | 2018 |
| Session Chair: <i>2017 Annual IEEE International Systems Conference (SysCon) - Complex Systems Issues II</i> (Montréal, Canada)                                                | 2017 |
| Organizing Committee and Session Chair: <i>Complex Adaptive Systems Conference - Cyber Physical Systems: Architectures</i> (Los Angeles, CA)                                   | 2016 |
